A Coordinated Systems Response in St. John’s for Individuals with Complex Needs
NAVNET is about asking different questions

“In most organizations, we are trained to ask, What’s wrong? And How can we fix it? This is a typical response. Instead, we can learn to ask two very different questions: What’s possible here? And Who cares?”

“When we ask Who cares?, we invite in others who are also passionate about an issue. And, when we ask “what’s possible,” it opens up to unprecedented creativity” ....Margaret Wheatley
What is NAVNET

A Partnership between Eastern Health, the Government and the Community

This team is working together to transform our systems response to those with “complex needs” in St. John’s from a fragmented often band-aid response to a coordinated and responsive model of service delivery
What we are all about

- Collaboration
- Coordination
- Information Sharing
- Being flexible in our approaches
- Focus on solutions
NAVNET Membership

Comprised of Senior Government Representatives from each of the following departments/organizations:

- Eastern Health (Mental Health and Addictions Program, Community Supports Program)
- Department of Health and Community Services
- Department of Advanced Education and Skills (AES)
- Department of Justice
- Newfoundland and Labrador Housing
- Community Representatives (Stella’s Circle, Choices For Youth)
What is “complexity”

When we discuss being “complex”, we usually refer to individuals who have multiple needs and who are frequent service users.

What we sometimes fail to recognize is that the programs/services and the departments that oversee them are also complex. How so?
Complex Systems

We make it very difficult for people who need support to find out about us.

We tend to be system focused instead of client focused. Do we expect individuals to come see us the majority of the time or do we go to where they are to connect?
Are we aware that we can exclude others?

We have a lot of policies/procedures that establish eligibility. While this is important, it also results in some people being excluded from obtaining the support they need.

We sometimes have beliefs/attitudes about some people and some kinds of behavior that makes us uncomfortable. What impact does this have?
What service delivery frequently looks and sounds like for some

- “Our hours are 9 to 5 Monday to Friday”
- “We only deal with income support, I can’t help you!”
- “You must have an address to get money from us”
- “Don’t THEY know we don’t provide that service?”
- “I don’t know where you can stay tonight, call back after 5pm”
Gaps and Barriers in our current systems

- Large silos which make it almost impossible for this group of clients to access services
- Inflexible policies with exclusionary criteria
- Gaps resulting from how policies are implemented on the front line
- Lack of safe and affordable housing in St. John’s
Gaps and Barriers in our current systems

- Gaps experienced by youth moving into adult system
- Lack of clarity about role and mandate of various systems
- Lack of well resourced services: home support, Case Management, Staff Training
Why NAVNET? Establishing the need

- High levels of recidivism among a small group of individuals with “multiple and complex” needs

- Service responses lacking, inadequate and clients refused services or excluded due to service eligibility requirements

- Significant public expenditure with limited impact
Who has complex needs?

Individuals who have multiple needs in their lives that results in them obtaining or trying to obtain services from a number of large and complex systems. These systems could include:

- Mental Health and Addictions;
- CYFS, AES, CSP, Justice,
- Housing, Medical, EI, OAS etc.
NAVNET Definition of Complex Needs

- Multiple and Complex Issues can include a combination of the following:
  - Persistent and severe mental health issues
  - Addictions
  - Brain Injury (acquired/birth)
  - Developmental Delays
  - Having challenges (including violent) behaviours that place the individuals at high risk to self, service staff, and/or community
What has NAVNET done

- Researched other jurisdictions to determine what has worked elsewhere
- Held a conference featuring four keynote speakers from Australia
- Completed a Cost Analysis
- Developed and signed an MOU which lead to the sharing of information across systems
- Developed and implemented a new coordinated service model
- Completed a year long evaluation of the initiative
NAVNET is all about less of this and more of.....
More coordination
What our service model offers

A coordinated, multi-system approach to service delivery

A process to address system gaps and barriers experienced by NAVNET clients

The ability to share information across NAVNET member systems

An opportunity for support team members to brainstorm, problem solve, work collaboratively and support one another in this work
Since August 2011:

- We have accepted referrals from NAVNET Member Departments/Organizations
- We have brought together multi-system teams for each of the clients
- These teams are made up of front line workers from different department/agencies providing support and services
Service Delivery moves from working as independent silos to working as multi-system teams.
How are teams working

Teams have allowed NAVNET to offer a multi-system coordinated approach to working with this population

Teams have gone through a process of planning which has included the use of an Assessment Matrix, the development of goals and interventions and the identification of measurable outcomes.
Collaboration
What does a coordinated model look like?

- Single point entry access service model

- Multidisciplinary assessment, support planning and intensive case management

- Team Lead position in all teams

- Client centred and portable services with a focus on relationship building, flexibility, creative approaches and “thinking outside the box”

<td><strong>Income</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>No income (income support or other sources)</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>On income support; engages in spontaneous or inappropriate spending. Not interested in support</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Low income; receptive to receiving support around budgeting etc. May be on re-direct to assist with this.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>May be low income but can met basic needs and manage money without assistance.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Income is sufficient, well managed; has discretionary income and is able to save.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
What is good coordination

Different people with various knowledge and skills working together towards a common goal(s)

Each member of a NAVNET Multi-System Team works with frontline workers from different departments/organizations to coordinate service provision for NAVNET Clients
Information Sharing
NAVNET and Information Sharing

A significant barrier is a real or perceived inability on the part of service providers to share information with one another. This happens because of the following:

- Legislation and policies prohibit or restrict sharing
- Lack of clarity around what can be shared, when and with whom
- Issues related to consent
When you do not share information, we are not:
How NAVNET address this

Development and implementation of a Memorandum of Understanding (MOU)

This legal document was developed, reviewed and approved by lawyers from all NAVNET member organizations.
NAVNET’s MOU

- Client signs NAVNET Consent Form – this is part of the referral process

- Multi-system team members (this is you) sign and have an Oath of Confidentiality stamped by a Commissioner of Oaths
What can you share?

As long as client signs the NAVNET Consent Form, NAVNET members are legally permitted to share Personal and Personal Health information as well as other relevant information as it pertains to NAVNET Clients, with other members of the team.
Early Indicators

In 2012, NAVNET has been evaluated by the Eastern Health’s Applied Health Research Division. Here is some of what they found:

Working across systems collaboratively leads to good outcomes for clients and the systems that work with them.
Client Outcomes

Early indicators for clients are showing:

- Clients are maintaining their housing for longer periods of time. There are less moves and reduced evictions.

- Client’s use of the Psychiatric Assessment Unit at the Waterford Hospital have decreased.

- Clients in-patient hospital stays are less frequent and the time they spend in the hospital is shorter.

- Rates of involvement with the law and levels of incarceration are lower.
System Outcomes

- Higher levels of service engagement
- Organizations that might have discharged clients are staying involved
- Information sharing has allowed for everyone to be on the same page
- Multi-system teams have increased collaboration, problem solving and creative outside-the-box thinking
What have other jurisdictions found?

Moving from a fragmented system to a collaborative one has led to:

- More stability in clients maintaining their housing
- Less emergency rooms presentations
- Less frequency in hospital admissions
- Fewer periods of incarceration
- Improvement in system capacity to work with this population
- A more cost efficient response
