Rural, Northern, & Aboriginal Health

Maternal and Neonatal Obstetrical Outcomes:

Measuring the impact of service accessibility, service levels and specialty care

The Newfoundland and Labrador Centre for Applied Health Research invites you to join us on February 12, 2013 at 12:30pm for the next meeting of our Research Exchange Group on Rural, Northern and Aboriginal Health. **Kris Aubrey-Bassler**, Assistant Professor in the Discipline of Family Medicine at Memorial University's Faculty of Medicine and Director, Centre for Rural Health Studies, will speak about the impact of hospital accessibility, level of services, and specialty of care providers on maternal and neonatal obstetrical outcomes in Canadian hospitals. The talk will include results of a research project in progress and a discussion about the intended analysis of results.

This Research Exchange Group meets regularly to discuss research, funding opportunities, and to collaborate on research projects. It also provides a forum where students, researchers, policy makers and members of the general public can meet to discuss issues related to rural, northern and aboriginal health. Attendance is free and all are welcome to join the meeting.

If you would like to join via teleconference, or would like to learn more about our Research Exchange Groups, please contact Rochelle.baker@med.mun.ca or call 709-777-8990.
